RESHMA K

Data Scientist | AI & Machine Learning

reshmakadampat@gmail.com | 7561073489 | Thrissur, Kerala | LinkedIn | GitHub | Portfolio

PROFILE SUMMARY

MSc Data Science graduate skilled in machine learning, deep learning, NLP, and computer vision, with hands-on experience using Python, TensorFlow, and PyTorch for AI-driven projects and research.

EDUCATION

MSc Data Science | Amity University | *2024 – 2026* | *CGPA: 8.62*

BSc Computer Science | Calicut University | *2021 – 2024* | *CGPA: 7.525*

DISSERTATION

Explainable AI for Automated Classification of Cervical Cancer | *2025 – 2026*

- Developed deep learning models for cervical cancer classification using ResNet18, EfficientNet, and Vision Transformer architectures
- Applied Grad-CAM, SHAP and attention rollout for interpretable AI and model evaluation using Python, TensorFlow, and PyTorch

RESEARCH

Endometriosis Detection in Laparoscopic Images using SSL & ViT | *2024 – 2025*

- Applied MAE-based self-supervised pretraining with ViT on the GLENDA dataset for multi-class classification
- Addressed label-efficient learning under limited annotation; identified dataset imbalance as key performance bottleneck

INTERNSHIP EXPERIENCE

Business Analyst Intern | ValueDX | *Mar 2026 – Jun 2026*

- Gained cross-functional exposure to business analysis workflows, requirements gathering, and process documentation in a professional environment

Data Science Intern | Cognifyz | *Sep 2024 – Oct 2024*

- Performed EDA, handled missing values, and engineered features for a regression model predicting restaurant ratings
- Conducted geospatial analysis and built interactive visualizations to uncover geographic trends

PROJECTS

Canteen Feedback Sentiment Analyser

- Built an NLP pipeline to analyze unstructured student feedback using TF-IDF, tokenization, and lemmatization techniques
- Developed sentiment classification models to categorize feedback into three sentiment classes
- Created interactive dashboards in Power BI to visualize sentiment trends and communicate actionable insights
- Managed the complete project lifecycle from data collection and preprocessing to analysis and reporting

Netflix Hidden Gem Score Prediction

- Developed an end-to-end machine learning pipeline for predicting hidden gem scores using XGBoost
- Performed data preprocessing, feature engineering, model evaluation, and Flask-based deployment
- Built interactive frontend interface for prediction visualization

LEADERSHIP & EXTRACURRICULAR

Secretary, Data Science Club | Amity University Bangalore | *2025 – 2026*

CERTIFICATIONS

Data Science & Analytics | ICT Academy Kerala | *2024* | *4 Months*

Predictive Modelling with Applications: Supervised and Unsupervised Learning | NPTEL | *2026* | *2 Months*

TECHNICAL SKILLS

Languages: Python, R, SQL **ML & AI:** Machine Learning, Deep Learning, Explainable AI, Computer Vision, NLP, CNN
Libraries: Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, **Visualization:** Power BI, Matplotlib, Seaborn
